

## Car Wash

# GET A CLEAN START WITH PAYMENT PROCESSING

EMV technology and new U.S. regulations are bringing radical changes to the payments industry. Is the car wash solution provider you're working with ready? If not, then we can get them there quickly and securely. Apriva helps car wash solution providers increase revenue now and prepare for the future. With our ultra-secure Integration Services, you can add payment processing to an existing solution instead of spending time, budget, and resources building a system from scratch.

### BENEFITS

#### Quick and Easy Integration

Our Integration Services offer a pre-built collection of solutions that make it simple to start accepting payments and increase revenue fast.

#### New Sales Opportunities

Car washes can easily add payment processing to any existing mobile, web, or traditional POS solution, and avoid missing out on sales when customers don't have cash.

#### Future-Ready Solutions

From traditional payments, to innovative technology like EMV, Apple Pay, Samsung Pay, the Apriva Gateway is continuously evolving to help car washes stay ahead of the game.

#### Diverse Payment Options

Apriva's payment processors support credit, debit, stored value, loyalty, EBT, and check transactions, as well as emerging forms of payment.

#### Secure Technology

Apriva's proven technology is PCI-compliant and has been rigorously tested and verified by the U.S. intelligence community and Department of Defense.

#### Complete Compliance

In addition to being PCI-compliant, Apriva Integration Services support advanced security features like card encryption at swipe, card tokenization, and EMV technology.

### GET STARTED

Integrate with the Apriva Gateway to quickly and easily add payment processing to an existing POS solution. With unrivaled security and support for over 40 devices and 35+ certified payment processors, there is no better partner that offers innovation, confidence, and the freedom to choose.
