Kiosk

PICK. PAY. GET ON WITH THE DAY.

Self-service just got sweeter. Apriva offers owners of vending machines, kiosks, and other unattended machines a simple way to accept credit card payments in addition to cash. With our pre-built collection of integration solutions, you can quickly add payment processing to an existing POS system instead of spending time, budget, and resources building a new system from scratch.

BENEFITS

Fast and Easy Integration
Our pre-built solutions enable kiosk merchants to quickly increase sales for vending, healthcare, ticketing, dining, retail, utilities, photo, micro markets, lottery tickets, and more.

Secure Technology
Apriva's proven technology is PCI-compliant and has been rigorously tested and verified by the U.S. intelligence community and Department of Defense.

Diverse Payment Options
Apriva's payment processors support credit, debit, stored value, loyalty, EBT, and check transactions, as well as emerging forms of payment.

Future-Ready Solutions
From traditional payments to innovative technology like EMV, Apple Pay, Samsung Pay, the Apriva Gateway is continuously evolving to help businesses stay ahead of the game.

New Sales Opportunities
Kiosk merchants can easily add payment processing to any existing mobile, web, or traditional POS solution, and avoid missing out on sales when customers don't have cash.

Complete Compliance
In addition to being PCI-compliant, Apriva Integration Services support advanced security features like card encryption at swipe, card tokenization, and EMV technology.

GET STARTED

Integrate with the Apriva Gateway to quickly and easily add payment processing to an existing POS solution.
